Helpful Tips When Having A Satellite Dish Installed

1. Follow the HOA Satellite Dish Guidelines. If you have questions about the best location for your dish, an Architectural Review Committee member will be glad to help you with recommendations.
2. Talk with your satellite dish installer. They are working on a fixed installation cost, so fast and easy is the name of the game. Don't fall into this trap. They will put your dish in any spot you like that can receive a signal.
 - a. These are the traps installers use:
 - i. "I have to install it closest to the reception box."
 - ii. "It will only work if it faces (east, south, west, north)."
 - iii. "The HOA can't tell YOU what to do."
 - iv. "It works best if it's perched on the roof line."
3. Be clear with your installer that the HOA has guidelines. Usually, they hear this and if you are intent on staying within the rules they will respond with options for you to consider. They don't want to lose the sale and will accommodate you any way necessary.
